Jim,
It was the third quarter monitoring report. You answered my point. MWD is just concerned about 1,4 Dioxane not being collected where it has consistently been showing up. Thank you.

Stan Carey, Superintendent
Massapequa Water District

Stan -- I'm not quite sure what caused your comment because the report you attached shows that all samples were analyzed for 1,4 dioxane. At the last quarterly meeting, Ed Hannon from Northrop Grumman asked about not analyzing every sample for 1,4 dioxane and I indicated that now that we have a good baseline, there might be some justification for reducing the amount samples analyzed for 1,4 dioxane and I asked him to send a written request, specifying what he

was asking for and indicated that we would consider it. We have not received such a request and the current approved workplans (both Navy and Grumman) require analysis of 1,4 for every sample. Call me if you want to discuss. Jim H

Jim,
Why would the DEC allow Grumman to stop collecting 1,4 Dioxane with so many wells showing measurable concentrations?

Stan Carey, Superintendent
Massapequa Water District
